PUBLIC STUDENT BUILD BRIEF / 13 NOVEMBER 2026

Albanian reading and writing app

Albanian Center for Education Care and Training (ACT Center)

Albania

THE NEED

An Android learning aid with Albanian-language reading, spelling, and writing practice for children with dyslexia or dysgraphia. It should work on common phones and keep essential exercises usable offline.

FIRST BUILD

- Two or three exercises approved by ACT Center
- An activity choice and difficulty setting for parents or professionals
- A simple progress view with fictional child profiles

IMPORTANT LIMITS

- Use fictional profiles only. No child identities, diagnoses, or education records.
- Do not present the app as diagnosis, therapy, or clinical assessment.
- Testing with children requires separate consent and safeguarding approval.

FIRST REVIEW

ACT staff and education professionals review a functional prototype with fictional profiles for language, accessibility, and ease of use.

WHAT TO SUBMIT

Submit one PDF with sample screens, an exercise flow, an offline plan, and how ACT will review or edit learning content.

Get paid $100 for a successful project submission.

Complete a solution that meets the brief. A proposal alone does not qualify.

Public summary only. Private application details are excluded.
