VENTURESOCIAL

PUBLIC STUDENT BUILD BRIEF

LIVE CHALLENGE

Volunteer coordination for two learning centers

Fundacion Bolivia Digna | Cochabamba, Bolivia

THE NEED

Staff use whiteboards and notes to coordinate volunteers, attendance, activities, and materials across two centers. An early web app exists, but needs secure sign-in and reliable shared data.

WHAT STUDENTS SHOULD BUILD

- One staff view for weekly schedules and activity changes at both centers.
- Volunteer views for assignments and schedule updates.
- Role-limited records for availability, attendance, and responsibilities.

A USEFUL FIRST TEST

Using synthetic records, a staff member creates a week of activities, assigns volunteers, changes one activity, and checks that the right people see the update.

CONSTRAINTS

Low ongoing cost. Existing code may be shared with selected builders. Spanish-facing terms matter; technical collaboration can be in English.

PROPOSAL

Show the key screens, data model, sign-in approach, and a low-cost maintenance plan.
