A clearer, editable website for CRDT

Cambodian Rural Development Team (CRDT) | Cambodia

THE NEED

CRDT wants a cleaner website with better-organized content and sharper imagery. Staff also need to update content after handoff and offer supporters a clear donation path.

WHAT STUDENTS SHOULD BUILD

- A responsive home page and one representative inner page.
- A simple editing workflow for CRDT staff.
- A donation journey using an approved hosted payment provider.

A USEFUL FIRST TEST

CRDT staff update sample content; a visitor finds program information and reaches the proposed donation path without the site handling card data.

CONSTRAINTS

English-language site. Preserve control of CRDT content and domain. Use only imagery CRDT approves for reuse.

PROPOSAL

Show a visual prototype, content structure, editing workflow, and safe donation/hosting plan.

Submit a PDF, with links if useful, at venturesocial.xyz/challenges/crdt-website-refresh

Privacy: No financial credentials, donor information, unpublished photos, or private content are included.
