VENTURESOCIAL / LIVE CHALLENGE

Find youth-friendly health services nearby

Patellah Youth Arms Organisation (PYAO) | Malawi

THE NEED

Young people often rely on referrals or visits to find sexual and reproductive health services. PYAO needs one place to show approved service locations and recent supply information.

WHAT TO BUILD

1. A phone-friendly map and searchable list of PYAO-approved services and support points.
2. A staff tool to update public contacts and supply status, with a visible last-checked date.
3. A dashboard of monthly total service use, without individual client records.

A USEFUL FIRST TEST

With sample records, a young person finds a nearby service. PYAO staff update one listing, confirm what is public, and review one monthly total.

WORK WITHIN THESE LIMITS

Use a standard browser on common phones, tablets, and computers, including slower connections. Show when supply information was last checked; treat stale information as unknown. Use only synthetic or anonymized samples. Do not include client records or unapproved provider details.

SAFE MATERIALS FOR THE BUILD

PYAO can share anonymized sample reports, example provider and supply data, and screenshots of its existing forms. Do not use real client data in a proposal.

PROPOSE A SOLUTION

Submit one PDF showing the map, staff update flow, privacy plan, website integration, and ongoing cost. Links are welcome. Deadline to be announced.
